PROFESSIONAL SUMMARY

Data Analyst with a strong foundation in Python, R, SQL, and Power BI, and hands-on experience building data-driven digital products across agile, cross-functional teams. Currently pursuing an MSc in Data Analytics at Dublin Business School. Brings a distinct combination of analytical depth and technical implementation skills, with experience translating complex business requirements into structured solutions. Familiar with GDPR and data governance principles, with a genuine interest in applying data analytics to drive client impact.

EDUCATION

Dublin Business School

Dublin, Ireland

Master of Science, Data Analytics

Expected Apr 2027

- Relevant Coursework: Statistical modelling, data processing pipelines, business intelligence, and data visualisation using Python and R, SQL for data querying and transformation, Power BI for reporting and dashboard development, data management concepts including data modelling, warehousing, governance, and GDPR compliance

University of Benin

Benin City, Nigeria

Bachelor of Science, Physics

Dec 2023

EXPERIENCE

Junior Front-End Developer

Sep 2025 – Apr 2026

RescueTap

Remote

- Collaborated with product and design teams in an agile workflow to translate business and campaign requirements into technical front-end implementations
- Integrated front-end interfaces with back-end services and REST APIs to deliver seamless digital experiences
- Identified and investigated performance issues using Chrome DevTools, applying root cause analysis to resolve anomalies and prevent recurrence
- Maintained structured technical documentation and sprint records to support team knowledge sharing and operational consistency
- Built and maintained responsive web components using React, JavaScript, HTML5, and CSS3, ensuring reliability, performance, and scalability
- Ensured WCAG accessibility compliance and cross-browser compatibility across all deliverables

Web Developer Intern

May 2024 – Mar 2025

Audu-Nepad

Wuse, FCT Abuja, Nigeria

- Contributed across the full project lifecycle, from requirements gathering and design through implementation and deployment
- Collaborated with cross-functional teams including designers and QA to ship iterative updates and reduce deployment friction through structured feedback loops
- Built device-agnostic, responsive web interfaces using modern JavaScript frameworks

Front-End Developer

Sep 2023 – Feb 2024

Aiki Technologies Limited

Lagos, Nigeria

- Delivered front-end implementations from technical specifications, working within defined technical and business frameworks
- Proposed and implemented site performance enhancements informed by engagement data
- Collaborated cross-functionally with product managers, designers, and back-end engineers across the development lifecycle

PROJECTS

Personal Data Analyst Portfolio | Web Development

- Designed and built a fully responsive portfolio site from scratch (HTML5, CSS3, vanilla JavaScript) to showcase machine learning, statistical analysis and Power BI work through an interactive report, slides and code viewer
- Deployed via GitHub Pages with a custom favicon and a cohesive visual system: osamuyi14.github.io/portfolio

Student Exam Performance Prediction | Predictive Analytics

- Cleaned and prepared a 6,600+ row student performance dataset, handling missing values, dropping non-predictive fields, and encoding categorical variables to build a model-ready dataset
- Built and tuned a Support Vector Regression model using GridSearchCV across multiple kernels, achieving an R^2 of approximately 84% predicting exam outcomes

Financial Planning and Savings Optimisation System

- Designed simulation functions modelling monthly savings growth under variable salary growth and interest rates, with input validation and structured error handling
- Implemented a bisection search algorithm to solve for the optimal savings rate needed to reach a target balance
- Built a rule-based, object-oriented scheduling system enforcing capacity limits and timetable-clash constraints

Xurya and Prodmax – Responsive Landing Pages

- Designed and built multi-section responsive websites featuring live metrics dashboards and structured data displays
- Integrated Google Fonts, Font Awesome, and Bootstrap grid to deliver brand-consistent, accessible, production-quality web experiences
- Published personal CV website via GitHub: github.com/Osamuyi14/CV

SKILLS

Data and Analytics: Python, R, SQL, Power BI, Data Modelling, Statistical Analysis, Predictive Modelling (Regression), Data Cleaning and Transformation, Reporting

Standards and Practices: GDPR Awareness, Root Cause Analysis, Technical Documentation, Data-Driven Decision Making, WCAG Accessibility, Cross-Browser Compatibility

Marketing Technology: Web and Marketing APIs, Digital Campaign Support, Customer Data Concepts, First-Party Data, Agile/Scrum

Front-End and Web: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, Angular, Vue.js, REST APIs, Git/GitHub
